SOWING AND GROWING
Sow the seed thinly direct into finely raked, moist, warm, weed free soil where the plants are to flower, 13mm (½") deep, raking in lightly (Germination 7-21 days). As the seedlings grow thin in stages to achieve a final spacing of 30-45cm (12-18"). Support the plants as they develop. Alternatively sow indoors in April, carefully acclimatising plants to outside conditions and plant out mid-late May.
HELPFUL HINT The petals and seeds make interesting additions to salads and cakes.
Quality Control: This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.
