SOWING AND GROWING
For first year flowering sow from January to March in a greenhouse/indoors using a moist, seed compost, sowing thinly and evenly over the surface. Firm gently. Do not cover with compost as Achillea seeds need light to germinate. Cover the tray with a sheet of glass to retain moisture and germinate at 18-21°C (65-70°F) avoiding direct sunlight. Transplant resulting seedlings 5cm (2") apart into trays and grow on. Acclimatise to outside conditions before planting 25-41cm (12-16") apart where the plants are to flower.
HELPFUL HINT
Superb border and cut flower plant.
Quality Control: This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.
