**SOWING AND GROWING**

Sow in a propagator on a windowsill or in a greenhouse at approx. 15-18°C (60-65°F) pressing the seed lightly onto a good quality, finely sieved, moist compost. Do not exclude light or allow to dry out (Germination 10-14 days). Transplant seedlings spacing them out 5cm (2") apart in trays and grow on. Plant out 38cm (15") apart in a sunny position after the danger of frost has passed.

**HELPFUL HINT** Pinch out the central shoot to promote bushy plants and more flower shoots.
