SOWING AND GROWING

Sow the seed thinly direct into finely raked, moist, warm, weed free soil where the plants are to flower 7mm (¼") deep. Germination normally takes 10-20 days. As the seedlings develop thin them in stages to achieve a final spacing of 23-30cm (9-12"), using the spare plants to fill any gaps. Ensure that any weeds are removed especially during the early stages of growth.

HELPFUL HINT
Use in colour drifts or as 'dot' plants.

Quality Control: This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.
