**SOWING AND GROWING**  
Sow the seed thinly direct into a finely raked, moist, weed free, warm seedbed 6mm (¼") deep. Germination usually takes 2-3 weeks. In the autumn transplant young plants to flowering position 15cm (6") apart, choosing a sunny or partial shaded site. Alternatively sow in August-September where required to flower and thin the resulting seedlings to the above spacing.

**HELPFUL HINT**  
Lovely plants for underplanting spring bulbs.

**Quality Control:** This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.
