SOWING AND GROWING

Sow in a propagator on a windowsill or in a greenhouse at approx. 15-20°C (60-68°F) using a good quality compost. Cover the seeds lightly with 3mm (1/8") sieved compost as light assists germination (Germination 7-21 days). Transplant seedlings when large enough to handle, spacing them 5cm (2") apart in trays and grow on. Gradually acclimatise before planting out after the danger of frost has passed 30cm (12") apart.

HELPFUL HINT
Will thrive in most well drained soils.

Quality Control: This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.
