SUTTONS SUNFLOWER
Giant Yellow

- Hardy annual – sow direct outside
- Ideal for children
- Easy to grow

Sow Plant out Flowers

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec

SOWING AND GROWING
Sow the seed thinly direct into finely raked, moist, warm, weed free soil where plants are to flower, 13mm (½") deep (Germination 7-21 days). As the seedlings grow thin in stages to achieve a final spacing of 30-45cm (12-18"). Support the plants as they develop. For early blooms sow indoors in April, carefully acclimatise plants to outside conditions and plant out mid-late May. Grow in a well manured soil in a sunny position and keep moist.

HELPFUL HINT For very tall plants, pinch out the side shoots. Petals and seeds make interesting additions to salads and cakes.

Quality Control: This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.
