Year 2												

SOWING AND GROWING

Sow mid March-May direct into finely raked, moist, warm soil where the plants are to flower at a depth of 6mm (1/4") covering the seed lightly. Soaking the seeds for several hours prior to sowing may improve the germination. Germination takes 10-14 days. Thin seedlings in stages to a final spacing of 23-30cm (9-12") apart removing any competing weed seedlings. Choose an open sunny position. Alternatively sow in September for early flowering the next summer.

FASTFLOWERS flowers in just 8-9 weeks

Quality Control: This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.
