SOWING AND GROWING

Sow March to early May direct outside, just below the surface of a moist, warm soil. Germination normally takes 14-30 days. Thin seedlings out in stages to achieve a final spacing of about 15cm (6"). For earlier flowering may also be sown in a propagator on a windowsill or in a greenhouse at approx. 16 -18°C (60-65°F) using a good quality moist compost. Cover the seeds with 3mm (1/8") sieved compost. Transplant seedlings into further trays and grow on. Acclimatise plants to outside conditions before planting out.

FASTFLOWERS flowers in just **9-10 weeks**

Quality Control: This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.
