Sow Plant out Flowers

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec

SOWING AND GROWING
Sow March to May about 1cm (½") deep, direct into a moist, warm soil. Germination normally takes 14-30 days. Thin seedlings out in stages to achieve a final spacing of about 41cm (16"). Plants thrive best in a well drained, sunny site. For earlier flowering, may also be sown indoors at approx. 18-20°C (65-70°F) using a good quality, moist compost. Cover the seeds with 6mm (¼") sieved compost. Transplant seedlings into further trays and grow on. Acclimatise plants to outside conditions before planting out.

FASTFLOWERS flowers in just **7-8** weeks

Quality Control: This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.
