SOWING AND GROWING

Sow the seed thinly direct into finely raked, moist, warm, weed-free soil where the plants are to flower 3mm (1/8") deep March-May (Germination 10-14 days). Thin the seedlings in stages to a final spacing of 10cm (4") apart. Make successional sowings throughout the summer to prolong the flowering display. May also be sown in autumn for early flowering the following year.
