**SOWING AND GROWING**  
Sow in a propagator on a windowsill or in a greenhouse at approx 15-20°C (60-68°F) using a good quality, finely sieved, moist compost. Cover the seeds with 6mm (¼") sieved compost. (Germination 14-21 days.) Transplant seedlings when large enough to handle singly into 75mm (3") pots. Finally transplant into large pots, grow bags or the greenhouse border allowing 45-80cm (1½-2½') between plants. Will fruit successfully in either a cold or slightly heated greenhouse.

**HEALTHY EATING**  
Eat on day of harvest for maximum vitamin content.

**Quality Control:** This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.
