SUTTONS BEETROOT
Globe 2

- Ideal for salads or cooking
- Good yields of tasty beet
- Smooth skinned, crimson roots

Sow Plant out Harvest

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec

SOWING AND GROWING
Choose a sunny site and sow thinly direct into finely raked, moist, warm soil at a depth of 13mm (½") in rows about 30cm (12") apart (Germination 10-14 days). Thin as necessary to leave 25-50mm (1-2") between plants. Grows best in good soil which has not recently been manured. Do not sow before April so avoiding the risk of plants running to seed (bolting). Make successional sowings so that young tender roots are always available.
Sowing → Cropping – 12 weeks.

HEALTHY EATING Rich in Potassium, Folate and Vitamin C. Known to boost the immune system.

Quality Control: This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.

Standard Seed.
EC rules and standards.
