SUTTONS CARROT
Chantenay Red Cored 2

- Easy to grow
- Long cropping period
- Boil, steam or stir fry

Sow Plant out Harvest

Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec

SOWING AND GROWING

Sow thinly direct into finely raked, moist, warm, weed free soil at a depth of 13mm (½") in rows about 30cm (12") apart (Germination 15-20 days). For table use, carefully thin the seedlings to 50-75mm (2-3") between plants. If roots are required for exhibition wider spacing is recommended. Crops lifted September-October may be stored in sand in a cool garage. Carrots grow best in a sunny position in soil not recently manured.
Sowing → Cropping – 20-22 weeks.

HEALTHY EATING

Use soon after harvest for maximum nutrients.

Quality Control: This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.

Standard Seed.
EC rules and standards.
