Sow thinly direct into finely raked seedbed at a depth of 13mm (½"). (Germination 7-12 days.) Transplant with a trowel or dibber when large enough to handle allowing 60cm (24") between plants each way. If the weather is dry, water in well when transplanting. Plant firmly. A well dug and manured site is essential for first class heads. As head develops – bend over a leaf to protect from frost.
