SOWING AND GROWING
Sow the seed thinly direct into finely raked, moist, warm, weed-free soil where the plants are to flower 13mm (½") deep. Germination normally takes 10-15 days. As the seedlings develop thin them in stages to achieve a final spacing of 15cm (6"), using the spare plants to fill any gaps. Ensure that any weeds are removed especially during the early stages of growth.

HELPFUL HINT Ideal for pots and tubs as well as summer bedding. Try the edible petals in summer salads.

Quality Control: This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.
