SOWING AND GROWING

Sow from mid March-May direct into finely raked, moist, warm soil where the plants are to flower at a depth of 6mm (¼"), raking over a fine covering of soil. Germination takes 10-14 days. Thin seedlings in stages. Final spacing 15-23cm (6-9") apart. Choose a sunny position. Alternatively, may be sown in September and overwintered in pots inside or outside with cloche protection for early summer flowering next year.

HELPFUL HINT
Make two sowings for flowering all summer.
