Year 2												

**SOWING AND GROWING**  
 Sow mid March-June direct into finely raked, moist, warm soil where the plants are to flower at a depth of 6mm (¼") covering the seed lightly with soil. Germination takes 10-14 days. Thin seedlings in stages to a final spacing of 15cm (6") apart removing any weeds at the same time. Choose a sunny position. Alternatively sow in September and protect with cloches in winter for early flowering next year.

**HELPFUL HINT** Successional sowing will give a supply of cut flower material throughout the summer.

**Quality Control:** This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.
