SOWING AND GROWING

Sow in a propagator on a windowsill or in pots or trays in a greenhouse at approx. 15-20°C (60-68°F) using a good quality, finely sieved, moist compost. Do not cover as seed needs light to germinate, but keep out of sunlight and maintain moisture (Germination 10-20 days). Transplant seedlings singly into 75mm (3") pots and grow on in good light. Finally when plants have made sufficient root, pot on into 125mm (5") pots. Grow in a greenhouse, as a houseplant or on a sunny patio.

HELPFUL HINT Pinch out growing points at a chosen height for attractive, bushy plants.

5 011567 110359 >

Quality Control: This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.
