SOWING AND GROWING

Sow in a propagator on a windowsill or in a greenhouse, at approx. 18-21°C (65-70°F) using a good quality, moist compost. Cover the seeds with 6mm (¼") sieved compost (Germination 5-10 days). Transplant seedlings into trays and grow on. Acclimatise plants gradually before planting out 30-40cm (12-16") apart in an open sunny position. May also be sown direct outside March-May for late summer flowering.
