**SOWING AND GROWING**

Sow in a propagator on a windowsill or in a greenhouse at approx. 18-21°C (65-70°F) using a good quality moist compost. Cover the seeds with 6mm (¼") sieved compost (Germination 5-10 days). Transplant seedlings into a seed tray and grow on. Acclimatise plants gradually before planting out 40cm (16") apart in an open sunny position.

Alternatively sow direct into garden soil from March to May for late summer flowering.

**HELPFUL HINT**  
Ideal plants for back of border.

**Quality Control:** This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.
