SUTTONS CYCLAMEN
(Hederifolium) Winter Cheer

 • Hardy perennial – flowers year after year
 • Pick for posies

Sow Plant out Flowers

Year 1													
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec	
Year 2													

SOWING AND GROWING

Sow in trays of a good moist seed compost in a coldframe or cool greenhouse, 13-15°C (55-60°F), covering the seed with 6mm (¼") of compost. Do not firm too heavily (Germination 30-150 days). Transplant seedlings when large enough to handle 5cm (2") apart into trays and grow on without check, planting out the following spring in clumps. An ideal item for naturalising under trees.

HELPFUL HINT Seed is slow and erratic to germinate and may benefit from pre-soaking for 24 hours in tepid water.

Quality Control: This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.
