**SOWING AND GROWING**  
Sow in a propagator on a windowsill or in a greenhouse at approx. 15-20°C (60-68°F) using a good quality compost and keep moist (Germination 5-20 days). Transplant seedlings into trays or singly into 75mm (3") pots and grow on. Acclimatise plants before planting out when all danger of frost has passed, 35cm (14") apart. Choose a sunny open position.

**HELPFUL HINT** Regular dead-heading will prolong the flowering display.

**Quality Control:** This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.
