**SOWING AND GROWING**

For first year flowering - sow mid January-March in trays at approx. 13°C (55°F) in a moist seed compost, covering with 1.5mm (1/16") of compost. Keep in the dark. (Germination 14-28 days). Transfer resulting seedlings 8cm (3") apart into further trays and acclimatise to outside conditions before planting out. For second year flowering - sow May-July, direct into a well prepared seedbed at a depth of 6mm (1/4"), thinning in stages to a final spacing of 45-60cm (1½-2').

**HELPFUL HINT**

Protect newly planted plants from slugs.

**Quality Control:** This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.  
**Note:** Seeds/plants harmful if eaten.
