SUTTONS DELPHINIUM

Delight Mix

- Hardy perennial – flowers year after year
- Tall flower spikes

■ Sow ■ Plant out ■ Flowers

Year 1	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Year 2												

SOWING AND GROWING

Chilling in the fridge for 2 weeks prior to sowing may improve germination. For first year flowering – sow mid January-March in trays at 13-21°C (55-70°F) onto a moist seed compost covering lightly (Germination 21-40 days). Transfer resulting seedlings 8cm (3") apart into further trays and acclimatise to outside conditions before planting out. For second year flowering - sow May-July direct into a well prepared seedbed at a depth of 6mm (¼"), thinning in stages to a final spacing of 45-60cm (1½'-2').

HELPFUL HINT
Tall plants for the back of a border.

Quality Control: This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.

Note: Seeds/plants harmful if eaten.
