SOWING AND GROWING

Sow in a propagator on a windowsill or in pots or trays in a greenhouse at approx. 15-20°C (60-68°F) lightly onto a good quality, finely sieved, moist compost. Do not exclude light or allow to dry out. (Germination 10-21 days.) Transplant seedlings 5cm (2") apart into trays and grow on without check. Acclimatise gradually before planting out 23-30cm (9-12") apart in a sunny position when the danger of frost has passed.

HELPFUL HINT
Remove faded flower heads to promote further flowering.

Quality Control: This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.

Important: F1 Hybrid seed is expensive to produce and should be handled with care.
