**SOWING AND GROWING**

Sow direct into finely raked, moist, warm, weed free soil where the plants are to flower at a depth of 6mm (¼") raking the seed in lightly. (Germination 14-21 days). Thin seedlings as necessary allowing approx. 30-38cm (12-15") between plants removing any competing weeds. Can also be sown in September in a seedbed and transferred to flowering positions the following spring.

**HELPFUL HINT** The seeds can be sprinkled on bread, cake and biscuits for a pleasant nutty flavour.
