PRIMULA

Denticulata Hybrids

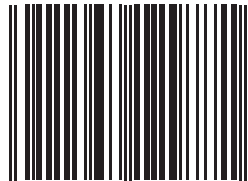

- Hardy perennial – flowers year after year
- Spring flowering item

■ Sow
 ■ Plant out
 ■ Flowers

Year 1														
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec		
Year 2														

SOWING AND GROWING
 Sow in a cold frame, greenhouse or windowsill indoors in pots or trays using a good quality, firmed, moist compost. (Pre-chilling in a refrigerator for 3 days prior to sowing may aid germination). Sow the seed thinly on the surface. Do not cover as light assists germination. Avoid direct sunlight. Maintain compost moisture. Germination takes 20-40 days. Transplant resulting seedlings 5cm (2") apart in trays and grow on. Plant out finally in a moist position.

HELPFUL HINT
 An excellent choice for a damp, shady area of the garden.

5 011567 129771 >

Quality Control: This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.
