SUTTONS CORN SALAD
(Lamb's Lettuce) Large Leaved

- Easy to grow summer/winter salad
- Long sowing/harvesting period
- Tender green leaves

Sow Plant out Harvest

Year 1												
	Jan	Feb	Mar	Apr	May	Jun	Jul	Aug	Sep	Oct	Nov	Dec
Year 2												

SOWING AND GROWING

Sow thinly direct into finely raked, moist, warm, weed free soil at a depth of 6mm (¼") in rows 15cm (6") apart. Thin seedlings to about 7-10cm (3-4") between plants. It is recommended that plants are protected with cloches against frost or severe weather. Alternatively, to keep leaves clean, can be grown successfully in 75mm (3") pots or in the greenhouse border. Pick a few leaves at a time from each plant to encourage fresh growth.
Sowing → Harvest – 12-30 weeks.

HEALTHY EATING For more tender leaves, cover with a box for a few days prior to harvest.

Quality Control: This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.
