SOWING AND GROWING

Sow thinly direct into finely raked, warm, moist soil at a depth of 13mm (½") in rows about 30cm (12") apart (Germination 6-12 days). Thin seedlings to 30cm (12") between plants. Use the thinnings in the salad bowl. Lettuce grow best in well cultivated soil in a sunny position. Water freely during periods of dry weather to produce succulent hearts and prevent premature running to seed (bolting). Avoid sowing during very hot weather or germination can be poor or non-existent.
Sowing → Cropping – 10-14 weeks.

HEALTHY EATING
Use soon after cutting for maximum vitamin content.

5 011567 167971 >

Quality Control: This seed has been carefully tested to ensure high germination. Prior to use, store in a dry cool place.

Standard Seed.
EC rules and standards.
